

POLICIES AND PROTOCOLS FOR COVID-19

Introduction

Coronavirus Disease 2019 (COVID-19) is a respiratory disease caused by the SARS-CoV-2 virus. To reduce the impact of COVID-19 outbreak conditions on our children, staff, and families, we need to plan for COVID-19 and mitigate the associated risks. This document provides guidance and direction for staff and families to reduce the potential risk for infection during Ontario's Recovery Period.

These instructions supersede *Preschool Canada* policies that are already in place. Pandemic plan measures/policy will be reviewed and signed off on with all centre staff prior to their start date.

Policy Statement

Preschool Canada is committed to providing a safe and healthy environment for children, families, and employees. Our goal is to limit the chances of communicable diseases within all our locations.

Purpose

To ensure that all employees and students are well aware of **York Region** Public Health guidelines regarding cleaning and disinfecting in all our locations.

Application

This policy applies to all employees, students, community members, and any other person engaged in business with the Preschool Canada team.

These enhanced measures will remain in place until such time that the Ministry of Education and **York Region** Public Health indicate it is safe to return to normal operating procedures or make further changes to health and safety recommendations. All Preschool Canada sites are required to follow all existing health and safety requirements and regulations and ensure all current infection prevention and control practices are adhered to.

Effective References and Resources

Child Care and Early Years Act, 2014
Operational Guidance During COVID-19 Outbreak - Child Care Re-Opening (Ministry of Education)
COVID-19 Guidance for Child Care COVID-19 Information for Re-opening Licensed Child Care Centres

Sanitization of
the space, toys,
and equipment

To minimize the spread of COVID-19, enhanced cleaning, and disinfection procedures must be put in place. Please refer to your Region Public Health presentation COVID-19 Guidance for Child Care for current requirements.

Procedure:

Cleaning – removing all visible dirt from the surface of an object.

Use detergent/soap and water (e.g. in a spray bottle prepared each day)

Remember to rinse off detergent/soap residue with clean water before disinfecting.

Disinfecting: reduces germs on a
surface Done after cleaning

Disinfectant must be approved by the local public health unit

When possible, do cleaning and disinfecting when children are not present (to avoid children breathing in sprayed chemicals).

Sanitizing: defined as the reduction of microorganisms to levels considered safe from a public health viewpoint. Sanitizing takes place after the cleaning step because it is most effective on a minimally soiled surface.

Cleaning Steps

Use detergent and warm water to clean visibly soiled surfaces

Rinse the surface with clean water (warm to tepid temperature preferred) to ensure detergent is removed

Bleach solution can be used as a
disinfectant Let the surface dry

Disinfecting

Use only disinfectants with a Drug Identification Number (DIN) that are on the Government of Canada approved list of COVID-19 disinfectants.

Instructions for using disinfectants can be found on the label or on the manufacturer instructions (i.e. Safety Data Sheet) to determine safe use and which PPE is required.

Chemicals like detergents, disinfectants, and sanitizers can be dangerous; therefore, always read and follow the manufacturer instructions, ensure all chemicals in containers are labelled correctly, and never mix two chemicals in the same container. If you are unsure...ASK.

Before using, ensure that the disinfectant is not expired (some disinfectants that are mixed each day, like bleach, must be discarded at the end of the day).

Cleaning and Disinfection frequency requirements

Clean and disinfect upon ENTRY to childcare (for staff):

- Any hard surfaces such as water bottles, travel mugs, cell phones, lunch containers

Clean and disinfect upon children's ENTRY to childcare:

- Any hard surfaces such as water bottles, containers,

etc. Clean and disinfecting frequencies for other surfaces and items:

Cleaning and disinfecting routines will be increased as the risk of environmental contamination are higher

Tables and countertops: used for food preparation and food service must be cleaned and disinfected before and after each use

Highchairs/chairs: must be cleaned and disinfected before and after serving food

Spills must be cleaned and disinfected immediately

Handwash sinks: staff and children washroom areas must be cleaned and disinfected at least two times per day and as often as necessary (e.g., when visibly dirty or contaminated with body fluids)

Floors: cleaning and disinfecting must be performed as required, i.e., when spills occur and throughout the day when rooms are available (e.g., during outdoor play)

Floor mats: cleaning and disinfecting must be performed throughout the day and at a minimum of twice daily

Outdoor play equipment: must be disinfected before each group uses it, and additionally as required (e.g., visibly dirty). Any outdoor play equipment that is used must be easy to clean and disinfect. It is recommended to limit the amount of outdoor play equipment in use.

Community/public playgrounds are not to be used.

During the cold season, follow the instructions on the cleaning solutions. Outdoor materials will need to be sectioned off and not be used until they are disinfected.

High-touch surfaces: any surfaces at your location that has frequent contact with hands (e.g., light switches, shelving, containers, handrails, doorknobs, sinks, toilets, etc.). These surfaces should be cleaned at least twice per day and as often as necessary (e.g., when visibly dirty or contaminated with body fluids)

Toys: will be disinfected at a minimum between cohort usages. Our goal is to clean them after each use, even within the same cohort. Mouthed toys will be removed immediately and cleaned and sanitized

Cots: Will be cleaned and disinfected after every use.

Bed linens: Will be laundered weekly unless it has been wet or soiled

Other shared items: e.g., phones, IPADS, iPods, attendance binders, etc., these must be disinfected between users

Clean and disinfect daily:

Low-touch surfaces (any surfaces at your location that have minimal contact with hands) must be cleaned and disinfected daily (e.g. window ledges, doors, sides of furnishings, etc.)

Clean and disinfect as required:

Blood/Bodily fluid spills: Using the steps below, the surface must be cleaned first then disinfected:

Isolate the area around the spill so that no other objects/humans can be contaminated

Gather all supplies, perform hand hygiene, then put on single-use nitrile gloves

Scoop up the fluid with disposable paper towels (check the surrounding area for splash/splatter) and dispose of in a separate garbage bag

Clean the spill area with detergent, warm water, and single-use towels Rinse to remove detergent residue with clean water and single-use towel Discard used paper towels and gloves immediately in a tied plastic bag

Use only disinfectants that have a Drug Identification Number (DIN). Low-level hospital-grade disinfectants may be used in and around the spill. Follow the manufacturer's instructions for the disinfectant

A final rinse is required if children come into contact with the area Remove gloves as directed and discard them immediately Perform hand hygiene as directed

Note:

If the spill occurs on a carpet, follow the above steps along with professional steam/wet cleaning the carpet

Crib and cot cleaning and disinfecting:

Cots and cribs must be labelled and assigned/designated to a single child peruse

Cots and cribs must be cleaned and disinfected before being assigned to a child

Crib mattresses must be cleaned and disinfected when soiled or wet and before being assigned to a child

High touch surfaces on cots and cribs must be disinfected at least twice per day and as often as necessary

Cots must be stored in a manner in which there is no contact with the sleeping surface of another cot

Bedding and blankets must be laundered weekly on the "hot" setting, and when soiled or wet

Additional Infection Prevention and Control Practices for Hygiene Items

Pacifiers must be individually labelled and stored separately (not touching each other); they must not be shared among children. The pacifier must be washed in soap and water upon arrival at the center. Label individual hygiene items and store them separately. For creams and lotions during diapering, never put hands directly into a lotion or cream bottles; use a tissue or single-use gloves. Upon arrival at the centre, wipe the cream/lotion container with a disinfecting wipe. Staff can identify personal childcare clothing that they can leave and launder at the childcare location. Linens must be washed on the "hot" setting.

Notes:

Refer to Public Health Ontario's and the Public Services Health and Safety Association's Child Care Centre Employer Guideline for more information on cleaning.

It is recommended that operators keep a cleaning and disinfecting log to track and demonstrate cleaning schedules.

Exclusion of Children and Staff who become Ill

Policy Statement

To ensure the health and well-being of children and staff within the Preschool Canada York Facility. Staff, children, and students who become ill while attending the program will be immediately isolated and required to leave the program. Staff must consistently assess the health of children. Our goal is to limit the chances of a communicable disease within the centre.

Purpose

Managing and Reporting Illness

To ensure that all employees are aware of York Region Public Health regulations regarding the exclusion of sick children in all our locations.

Application

This policy applies to all employees, parents/guardians, students/volunteers, community members, and any other persons engaged in business with Preschool Canada.

Procedures

To minimize the spread of COVID-19 and contain outbreaks within the childcare centre, staff/home childcare providers, parents and guardians, and children will not attend the program if they are sick, even if symptoms resemble a mild cold. Standardized screening questions are to be used.

When assessing symptoms, the focus should be on evaluating if they are new, worsening, or different from an individual's baseline health status (check off "Yes"). Symptoms associated with known chronic health conditions or related to other known causes/conditions should **not** be considered unless new, worsening, or different from an individual's baseline (check off "No"). If an individual does not pass the screening tool (i.e., screen positive), they should not attend childcare/work, and appropriate recommendations will be provided by public health.

Follow the steps below on when to exclude a child with COVID-19 symptoms (refer to the most recent health screening checklist) [COVID-19 Screening Tool - Version 3](#)

Symptoms of COVID – 19 – For Children

Question 1: Active Screening Tool

- Fever and/or chills (Temperature of 37.8 C / 100.0 F or greater)
- Cough (more than usual if chronic cough) including croup; barking cough, making a whistling noise when breathing
- Shortness of breath (Dyspnea, out of breath, unable to breathe deeply, wheezing, that is worse than usual if chronically short of breath)
- Decrease or loss of smell or taste (New olfactory or taste disorder)
- Sore throat (Painful swallowing or difficulty swallowing)
- Stuffy nose and/or runny nose (Nasal congestion and/or rhinorrhea)
- Headache (New or persistent, unusual, unexplained, or long-lasting)
- Nausea, vomiting, and/or diarrhea

- Fatigue, lethargy, muscle aches or malaise (The feeling of being unwell, lack of energy, extreme tiredness, poor feeding in infants)

Symptoms of COVID – 19 – For Adults

- Fever and/chills (Temperature of 37.8 C / 100.0 F or greater)
- Cough (more than usual if chronic cough) including croup; barking cough, making a whistling noise when breathing
- Shortness of breath (Dyspnea, out of breath, unable to breathe deeply, wheezing, that is worse than usual if chronically short of breath)
- Decrease or loss of smell or taste (New olfactory or taste disorder)
- Sore throat (painful swallowing or difficulty swallowing)
- Stuffy nose and/or runny nose (nasal congestion and/or rhinorrhea)
- Headache (New or persistent, unusual, unexplained, or long-lasting)
- Nausea, vomiting, and/or diarrhea
- Fatigue, lethargy, muscle aches or malaise (The feeling of being unwell, lack of energy, extreme tiredness, poor feeding in infants)
- **Abdominal Pain**
- **Pink eye (conjunctivitis)**

Note: *All the symptoms stated above need to be not related to other known causes or conditions for a child/staff to be exempt from the childcare centre. Please read below for more information.*

Note: *Runny nose; if a child is experiencing a runny nose, the child should be kept home and should be monitored for their symptoms. When the child feels better, they can return back to the childcare centre. No COVID-19 testing is needed. If the child's symptoms worsen and/or develops other symptoms, the parent/guardian should contact their health care provider for further advice. Mild symptoms known to persist in young children may be ongoing at the time of returning to childcare if other symptoms have been resolved. **Children who experience a runny nose must be excluded from the childcare centre for at least 24 hours until symptoms improve.***

If the child has developed any of the above symptoms, the child must be isolated immediately from the other children in a separate room, if available, and supervised at all times.

Differences of Symptoms from Online Screening Tool

Parents/guardians, staff members, volunteers/students, and essential visitors are able to complete the online screening tool; COVID- 19 Screening Tool - Version 3.

- Parents/guardians are to complete the screening using the online Screening Tool; staff must verify completion (e.g., show a screenshot of completion at the screening station) verbally.
 - Document the following; Child's name, parent's name, online results and temperature.
-

- Any individual that has not completed any online screening, the designated staff member/screener is to ask the parents/guardians to complete it before the entry of childcare

Procedures of Ill Child(ren)/ Exclusion of Ill Child(ren)

- If the individual responds "Yes" to Question 1 on the screening tool, they are to self-isolate and only leave the house if they will be getting tested or seeking medical attention.
 - ❖ Contact childcare centre to inform the supervisor
 - ❖ Speak with a doctor/health care provider to receive advice or an assessment, including to see if a COVID-19 test needs to be completed.
 - ❖ Siblings and household members without any symptoms may continue to attend childcare/work.
- If the individual responds "Yes" to Questions 2 for one of the symptoms, the individual will need to self-isolate for 24 hours. They should not leave unless they are being tested or seeking medical attention.
 - ❖ Contact childcare centre to inform the supervisor
 - ❖ After 24 hours if your symptom is improving, they can return to childcare when they are feeling well enough to do so. They do not need to get tested.
 - ❖ Siblings and household members without any symptoms may continue to attend childcare/work.
- If the individual responds "Yes" to two or more of the symptoms to Question 2, they should self-isolate and not leave except to get tested or for a medical emergency.
 - ❖ Contact the childcare to let the supervisor know of the results.
 - ❖ Speak with a doctor/health care provider to get advice or an assessment, including if they need a COVID-19 test.
 - ❖ Siblings and household members without symptoms may go to childcare.
- If the individual responds "Yes" to Question 3, 4, 5, or 6, the individual will need to self-isolate for 14 days. They should not leave unless they are being tested or seeking medical attention.
 - ❖ Contact the childcare to inform the supervisor of results
 - ❖ Speak with a doctor/health care provider to receive advice or an assessment, including if you need a COVID-19 test.

Note: Individuals with any symptoms and the siblings (household members) are to contact their local Public Health in York Region to see if they have different rules based on local risk.

Staff must document the situation in the Daily Communication Log and notify the Supervisor or designate immediately to ensure that this information is managed and recorded in the child's file on the Symptoms of Ill Health and report the incident to the Health Department, as necessary/appropriate.

Returning from Exclusion Due to Illness (Testing)

- After developing symptoms, in general, children should no longer have a fever, and their symptoms improve to be able to return.

Ill individuals **who test negative** must be excluded until:

- It has been at least 24 hours since symptoms began **AND**
- The individual does not have a fever (without using medication)
- No contact with someone with COVID-19 symptoms

Documented proof of the negative test is not required to return.

Note: *Mild symptoms known to persist in young children (e.g., runny nose) may be ongoing at the time of return if other symptoms have been resolved.*

Ill individuals **who test positive** must be excluded until:

- The individual has isolated for 14 days after the onset of symptoms **AND**
- They do not have a fever (without using medication) **AND**
- If the individual symptoms have started improving.

Ill individuals who **were not tested** must be excluded for 14 days unless **ALL** the following:

- A health care provider diagnosed them with another illness
- They do not have a fever (without using medication) **AND**
- It has been at least 24 hours since their symptoms started improving
- Documented proof of results is not required to return

Note: Siblings (or other household members) of the ill child **may** attend childcare as long as they have no symptoms.

Note: If the symptomatic child has been in close contact with a confirmed case of COVID-19 or has travelled outside of Canada in the past 14 days, siblings are required to go home and self-isolate.

Exposure to a Positive Case of COVID-19

Positive Case of COVID-19 in childcare for an individual:

- Child(ren) with any ill symptoms. Childcare operator to conduct surveillance and record all illnesses in the centre.
 - Childcare centres are to report to York Region Public Health when there are two or more symptomatic individuals within 48 hours.
 - Ill children are to be separated from others and are supervised in a designated room/space, and parent/guardian is contacted for immediate pick-up.
-

- Designated staff members providing care to a child who is ill should maintain a distance of 2 metres. Wear full PPE (masks, gloves, gown and face shield)
- Staff who are ill are to be sent home immediately.

Positive Case of COVID-19 in a childcare grouping/classroom:

- If a child(ren) is to develop COVID-19 symptoms, they are to self-isolate
- Childcare supervisor/designated person is to contact public health unit and follow their instructions to whether they need to close a room, or the centre, or self-monitor themselves

Closure Wait Time:

- Childcare providers must follow York Region Public Health Direction
- York Public Health will provide direction on re-opening
- Testing turnaround times vary and will impact the length of the closure period

Once the staff's/student's/child's results are known:

If a staff/student/child has tested positive, Public Health will identify and notify close contacts. Staff, students, or children who have been identified as a close contact should be excluded from the childcare setting for 14 days after their last exposure.

A serious occurrence will be reported to the Ministry when a child, staff provider, is suspected or has a confirmed case of COVID-19 – follow Preschool Canada's serious occurrence policy.

Procedure:

Use this section to outline procedures to manage and report illness including, increased hand hygiene procedures, enhanced cleaning and disinfection of room and toys and linen where the asymptomatic child has been present, and how the child or staff will be isolated, and parents/guardians contacted.

In the event of a suspected case (evidence of symptoms):

1. The child will be isolated from the cohort
 2. Staff supervising isolated child will maintain physical distancing if possible and
 3. Wear full PPE. The child will be offered a mask and will wear it if it can be worn with ease. If a staff member has symptoms or a suspected case, they will be sent home immediately, and then we will follow steps 4, 5 and 6.
 4. Child's parent will be called for immediate pick-up, along with any sibling in the program
 5. **York Region Public** health will be notified, and we will follow their direction. Room, the child/staff, was in an isolation room will be fully sanitized. If one or more symptom is present/confirmed case, a Serious Occurrence will be reported with the Ministry of Education
 6. Individuals who were previously ill and have been symptom-free for 24 hours must complete additional screening using the COVID-19 Re-entry Screening Form for Previously Ill Individuals PRIOR to also completing the daily active screening process. A medical note is not required.
-

Encouraging Physical Distancing

As of September 1, 2020, the program will return to maximum group sizes as set out under the CCEYA (i.e., licensed age groups prior to COVID-19). Staff and students are not included in the maximum group size, but as much as possible are to stay with the same grouping. Children are permitted to attend on a part-time basis, and as with full-time children, they should be included in one group and not mix with other groups as much as possible.

Procedure:

Use this section to outline procedures to encourage physical distancing. Examples might include (but are not limited to):

- Increasing distance between cots and cribs during sleep times
- Spreading children out into different areas at meal and dressing time
- Incorporating more individual activities or activities that encourage more space between children
- Moving activities outside to allow for more space
- Having singing activities outdoors, Strollers, and Community Walks:
- Children are physically distanced as much as possible. (E.g. spacing the children by leaving empty seats between each child)
- The back of the stroller is high enough to form a solid physical barrier between each child. The stroller is designed so that the children are not face to face
- Children are assigned to a stroller seat

Hygiene
Practice

[Washing hands.](#)

Follow Preschool Canada policy

Parent
Drop-off
and Pick-up
Procedures

All staff, children, parents, and visitors must be screened prior to entry and re-entry if they have left the premises. Parents are not permitted past the screening area. Staff must wear full PPE for screening procedures when a distance of 2-metres cannot be maintained.

Procedure:
(screening station set-up, response to positive screening)

Pick up Procedure

Parent or guardian picking up a child from the childcare will need to call the centre upon arrival, and staff will wash their hands and the child's hands, collect their belongings and bring the child out of the classroom, and release the child to their pick-up person from the classroom emergency door while maintaining a physical distance. Staff releasing the child will be wearing a mask.

Health
Check
Screening

Procedures

Prior to active health screening at Preschool Canada, staff must complete training on how to properly wear PPE (medical masks and face shields) and complete the screening process. Assign and train staff the roles of screening, escorting children to their classroom at drop-off time and returning them to the entrance at pick-up time (i.e., runner), and for cleaning and disinfecting.

When assessing symptoms, the focus should be on evaluating if they are new, worsening, or different from an individual's baseline health status (check off "Yes"). Symptoms associated with known chronic health conditions or related to other known causes/conditions should **not** be considered unless new, worsening, or different from an individual's baseline (check off "No"). If an individual does not pass the screening tool (i.e. screen positive), they should not attend childcare/work, and appropriate recommendations will be provided by public health.

Follow local public health unit guidelines for reporting a suspected case of COVID-19 and follow all directions given by public health.

Follow the Ministry of Education guidance for reporting Serious Occurrences related to COVID-19.

Track all child and staff absences in the daily written logbook. Record the reason for absence, including symptoms of ill health, on the Symptoms of Ill Health form and any template required by the local public health unit.

Keep the Symptoms of Ill Health form in each child's and each staff's file so that symptoms can be kept confidential.

Please refer to the Ministry of Health's [COVID-19 and Child Care Screening Tool - Version 3](#) every day before they attend childcare or work. When staff, children, visitors arrive, please ask question number 6 (Active Screening Tool).

Symptoms of COVID – 19 - For Children

Question 1: Active Screening Tool

- Fever and/chills (Temperature of 37.8 C / 100.0 F or greater)
- Cough (more than usual if chronic cough) including croup; barking cough, making a whistling noise when breathing
- Shortness of breath (Dyspnea, out of breath, unable to breathe deeply, wheezing, that is worse than usual if chronically short of breath)
- Decrease or loss of smell or taste (New olfactory or taste disorder)
- Sore throat (painful swallowing or difficulty swallowing)
- Stuffy nose and/or runny nose (nasal congestion and/or rhinorrhea)
- Headache (New or persistent, unusual, unexplained, or long-lasting)

- Nausea, vomiting, and/or diarrhea
- Fatigue, lethargy, muscle aches or malaise (The feeling of being unwell, lack of energy, extreme tiredness, poor feeding in infants)

Symptoms of COVID – 19 – For Adults

- Fever and/chills (Temperature of 37.8 C / 100.0 F or greater)
- Cough (more than usual if chronic cough) including croup; barking cough, making a whistling noise when breathing
- Shortness of breath (Dyspnea, out of breath, unable to breathe deeply, wheezing, that is worse than usual if chronically short of breath)
- Decrease or loss of smell or taste (New olfactory or taste disorder)
- Sore throat (painful swallowing or difficulty swallowing)
- Stuffy nose and/or runny nose (nasal congestion and/or rhinorrhea)
- Headache (New or persistent, unusual, unexplained, or long-lasting)
- Nausea, vomiting, and/or diarrhea
- Fatigue, lethargy, muscle aches or malaise (The feeling of being unwell, lack of energy, extreme tiredness, poor feeding in infants)
- **Abdominal Pain**
- **Pink eye (conjunctivitis)**

Note: *Runny nose; if a child is experiencing a runny nose, the child should be kept home and should be monitored for their symptoms. When the child feels better, they can return back to the childcare centre. No COVID-19 testing is needed. If the child's symptoms worsen and/or develop other symptoms, the parent/guardian should contact their health care provider for further advice. Mild symptoms known to persist in young children may be ongoing at the time of returning to childcare if other symptoms have been resolved. **Children who experience a runny nose must be excluded from the childcare centre for at least 24 hours until symptoms improve.***

Note: *All symptoms stated above need to be not related to other known causes or conditions for a child/staff to be exempt from the childcare center. Please read below for more information and see the *Managing and Reporting Illness**

Screening Procedures

As directed by the Ministry of Health and Ministry of Education, service providers could begin to actively screen children entering childcare based on the new Ministry of Health Exclusion criteria and questions.

Parents/guardians, staff members, volunteers/students, and essential visitors are able to complete the online screening tool; [COVID-19 Screening Tool for Children and Childcare - Version 3](#) or the paper screening forms provided.

Electronic Screening Procedure

Every parent/caregiver, child, staff and essential visitor must be actively screened prior to arrival at the centre.

- Online Screening or online assessment tool is updated regularly to reflect the current Ontario government.
- The assessment tool is to be completed by the individual to assess their unique health situations; recommendations are provided for the next steps.
- Parents/guardians/staff/essential visitors are to be provided with the electronic daily screening form and instructions on how to complete and submit daily to the centre. Please complete the Ontario [COVID-19 Screening Tool for Children and Childcare - Version 3](#) every day before they attend childcare or work.
- The Centre will review each completed electronic screen and file forms on-premises.
- The Ministry of Health and Ministry of Education mentions that Staff will verbally confirm with each parent/guardian/visitor at drop off that the screen has been completed and that all questions were responded to with "No."
- When the screening tool is complete, and the individual does not pass the screening tool (e.g., screens positive), the individual should not attend childcare or work; recommendations will be provided.
- In incidents of ill health, the parent/guardian/staff/essential visitors will be directed to review the COVID-19 assessment tool on the Ministry website.
- Parents/staff members/essential visitors must notify the Director if they have screened positive and will not be attending childcare/work.
- Director will develop a process for documentation of all screening results.

Note: *Currently, there are no options to download the online results from the online tool if the individual screens are positive.*

Note: *If the individual screens negative, there is an option to download the results and should be shared with the Director.*

Note: *Every child must be screened prior to being admitted into the childcare center. Staff must follow the screening checklist for each person and record the outcome.*

In-Person Screening Procedure

Every staff, parent/guardian, child, volunteers/students, and any essential visitor must be actively screened in the foyer of the centre. Staff must follow the screening checklist for each person and record the outcomes.

- If the parents did not do the screening tool at home, staff will provide them with an electronic device to complete the online screening tool
- The director/designated staff member will confirm that the child has passed the screening tool to ensure that the child can attend childcare.
- Director will need to ensure that there are verbally confirmed that the parents have done the online screening and document the result, for example (parent name- child name- result - day and time).

In York Region, childcare centres are to continue to use the new online or in-person screening provided by the Ministry of Health and Ministry of Education.

- Parents/guardians are not permitted past the Active Screening designated area to ensure physical distancing.
- Only one parent/guardian is permitted into the Active Screening area.
- Parents/guardians can call ahead of time to answer them (daily, weekly, or monthly) screening questions. The designated staff member/screener is to record answers on the appropriate screening document.
- All daily active and passive screening results must be maintained and kept on-site. This should include (Name, contact information, time of arrival and departure, and screening completion/result)
- Parents are not to fill out their screening documents.
- A parent/guardian can answer the screening questions for their child(ren)
- If a parent/guardian, staff, child(ren), and any visitors respond YES to any of the Screening questions, this individual is not permitted to enter the centre/premises at any given point. This does not need to be reported to the local health agency.
- Staff should continue to self-monitor themselves and monitor children in care throughout the day. Any symptoms must immediately be reported to the centre supervisor.
- Screeners should take appropriate precautions when screening, including maintaining physical distancing of at least 6ft/2 metres from others.
- Ensure that surgical masks and face shields are worn anytime that an individual is in the screening area.
- Eye protection must be worn when it is anticipated that the screening could generate bodily fluids (e.g. the child is upset and crying during a screening)

Health Screening Staff must wear appropriate PPE at all times, which include:

- Masks
- Eye protection or face shields

PRESCHOOL
CANADA
Early Learning Academy

Refer to Protective Personal Equipment Policy and Procedures for further information on required PPE

- All entrances have hand sanitizer (60 - 90%) and if in an enclosed space and physical distance of 2 metres, cannot be maintained. Parents/guardians and staff/providers will wear a face mask and face shield.
- Preschool Canada signage/markings on the ground direct families through the entry steps.
- Personal belongings (e.g., backpack, clothing, etc.) should be minimized. If brought, belongings should be labelled and kept in the child's cubby/ designated area.

Parents,
Visitors,
Vendors,
Contractors
& Inspectors

Public Health requires that the number of individuals entering the childcare center be limited to staff, children, and only absolutely necessary individuals.

An individual permitted to enter the center must be screened using the active screening questions, including taking their temperature, and their contact information must be recorded on the visitor log in the event public health must contact them for the purposes of self-isolation or testing.

The following individuals will not be permitted to enter the center:

- New parents/tours (tours will be done virtually using video)

The following individuals are permitted to enter the centre after being screened:

- Government representatives – Program Advisor, Public Health Fire inspector, etc.
- Resource Consultant, enhanced staff, therapists
- Preschool Canada Head Office management team
- Post-secondary school placement students (must stay with the same cohort of children)

Essential visitors are required to wear medical masks and eye protection wear while inside the childcare premises, including hallways.

Supply deliveries to call the centre when they arrive and meet you at the entrance to receive deliveries.

Contractors like cleaners or emergency services like plumbers must be screened and their contact information recorded on the visitor log. Try to schedule their work for a time when children are not present.

PPE

As of September 1, 2020, all adults and children grade four and above wearing a mask will be mandatory

Procedures

PPE is equipment worn to protect the worker from infected droplets and contaminated surfaces. PPE used in a childcare setting can include:

- Eye protection - protects the eyes from splashes, sprays and droplets
- Gloves - gloves and good hand hygiene protect you and others
- Gowns - long-sleeved gowns protect clothing from becoming contaminated
- Masks - protects the inside of the nose and mouth

When you wear a mask, you should also be sure to clean your hands frequently with soap and water or 60%-90% alcohol-based hand sanitizer. Masks can also be worn to prevent spread from an infected person to others by containing infected droplets (source control).

Wearing the mask will be mandatory at all times when you are working with children indoors and outdoors when a physical distance of two metres cannot apply.

Masks must be worn properly at all times, without exception. This includes:

- On the face properly covering the mouth and nose
- Not lifted or dropped to the chin or around the neck
- All straps must be securely fastened
- Once the mask is secure, consider it your face. DO NOT touch or move it
- Masks are single-use

Change your mask if it becomes moist or dirty. To put on the Mask:

- Wash or sanitize your hands
- Check the mask for tears or faulty straps
- The stiff bendable edge is the top
- Holding the mask by the upper strings, tie in a bow near the crown of your head, or if the mask has bands, loop over your ears
- Holding the mask by the bottom strings, pull the bottom of the mask over your mouth and chin, and tie in a bow near the nape of your neck
- Ensure the mask covers your mouth, nose, and chin
- Press and mould the bendable upper edge to the shape of your nose and cheeks

Wash or sanitize your hands To remove the Mask:

- Wash or sanitize your hands
- Only touch the straps; avoid touching the front of the mask as it is contaminated
- Untie the bottom strings and then the upper strings
- Dispose of the mask directly into the garbage
- Wash or sanitize your hands

**PRESCHOOL

Early Learning Academy

Parent
Fees

Any child who was receiving care in a Preschool Canada program immediately prior to the closure will be offered a childcare space for September 1, 2020, or later. Families will have 14 days to accept or decline the placement. If placement is accepted, operators may charge a fee to use or hold the space as of September 1, 2020, whether the child attends or not. If the placement is declined, the operator may offer the placement to another child.

Scheduling
Shifts

As of September 1, 2020, the program will return to maximum group sizes as set out under the CCEYA (i.e., licensed age groups prior to COVID-19). Staff shifts will meet the ratio following the requirements above.

Procedures

All Preschool Canada staff shifts should follow CCEYA regulations to meet the children's ratio, keeping in concertation staff well-being while we are facing a pandemic, including staff coverage for lunch and breaks, sick leave and vacation.

*Note: While we are in a pandemic, this document will keep changing to adapt with the most up to date requirements from your region, the Ministry of Education and the Ministry of Health. As well, all regulations from the Child Care Centre Licensing Manual are to be checked for compliance.

If you would like to add anything to this document, please notify head office, and we will make the necessary changes.
